COVID19 UPDATE

In accordance with ACPAT and RAMP guidelines R S Veterinary & Rider Physiotherapy will be commencing a limited service to see some patients from Monday 18 May 2020. We recognise that we are still in a critical phase of the pandemic and whilst the NHS services are coping at present there is a risk that the situation may change if strict measures are not adhered to. I will therefore be restricting assessment/ treatment at present to urgent cases or those that may be at risk of deteriorating without treatment. I will continue to be operating a phone/ video consultation service for routine cases and will review the situation as the Covid19 status changes. Please contact me to discuss individual cases and to enable appropriate risk assessments to be carried out.

Please see the following guidelines with regards to visits
